INTRODUCTION

Management Environment need noticed to use continuity life human (Jaman, 2023). In the countryside environment life Not yet organized with Good so that arise various problem especially for life human and health problems. Then with increasingly widespread industry standing big as well as housing built with poor Governance that is not care to environment surroundings (Foster, 2020). It is impact on life humans on earth who became No Healthy so that lower quality life especially on the environment surroundings With concentration and quantity certain will affecting habitat and damage environment added Again with presence exists waste House stairs and industry can impact negative to environment especially for health human.

According to Invite Law No. 23 of 1997, environment life is unity room with all objects, forces, circumstances, and beings' life, incl humans and their behavior, which influence continuity life and welfare man as well as creature life other (Ramadhani & Lubis 2021). Whereas room scope environment Indonesian life includes space, the place of the Unitary State the Republic of Indonesia with an insight into the archipelago within carry out sovereignty, rights sovereign, and its jurisdiction.

Based on the preparation of Regional Apparatus Work Plans is a form of implementation of Law Number 25 of 2004 concerning System National Development Planning (Chimhowu et al.,

2019). Constitution This in a way substance mandate preparation Plan The work of the Environmental Service as a basis for preparing the Activity Plan and Budget (RKA) of the Environmental Service as one of the supporters of the successful achievement of regional development targets as stipulated in the Amendment RPJMD Year 2019-20 24 (Arisa & Yuningsih, 2023). National Development Planning System poured in The law substantially mandates the preparation of a Work Plan as the basis for preparing Activity Plans and Plans work of the Environmental Service Life is a planning document for one year that contains policies, programs and activities, activity locations, performance indicators, target groups, indicative ceilings and advanced forecasts that describe funding needs to ensure the continuity of approved policies for each program and activity (Faulkner et al., 2021).

The process of preparing the Renja is carried out through stages (Arisa & Yuningsih, 2023): (1) Preparing the preparation of the Renja, (2) Preparing the draft Renja, (3) Implementing the OPD forum, (4) and Determining the Plan work ja. Ren cana Work Environmental Service Life as referred to is the result of discussion of proposed programs and activities which have been synergized with the results of the Regency Musrembang while still referring to the Plan strategic strategy. (Mota et al., 2021) Next Ren cana work of the Environmental Service H is alive 20 23 will serve as a guideline for the implementation of programs and activities for 20 23 to support the realization of the regional vision and mission which is the responsibility of the Bone Regency Environmental Service and become the basis for estimates of budgeting which will be the basis for preparing the Budget Work Plan and Budget Implementation Document for the Environmental Service Live in 2023.

Activity Counseling will importance awareness of environmental law (Agboola et al., 2020) about protection and management environment life in the village Kading is as a guideline in implementing programs and activities during 20 23 to improve benchmarks so that they can consistently and consistently carry out activities in accordance with the position and role held for achieve organizational goals (Arif et al., 2019). Synchronize and synergize Environmental Service programs and activities with regional development targets and targets as formulated in regional planning documents and contribute to the successful achievement of regional development targets set out in the RKPD document.

Stages Of Devotion

Environmental law is set governing regulations about protection and management environment live. Protection and management environment life is effort carried out systematically and integratedly for conserve function environment live and prevent happen pollution and/ or damage environment life through action structuring, utilization, control, maintenance, supervision and enforcement law (Sanz et al., 2020). The stages of the control and management program environment done a number of Stage That is

Stage I: Do Focus Group Discussion on Government The village in the village Kading Bone district, Together with student with discuss related: (1) Prevention Pollution and Damage Environment Life as well as the impact it causes; (2) Do Coordination various existing sector _ covered area or village in set problems that occur; (3) Do synchronization of data and regions that give rise pollution environment life; (4) Implementation prevention pollution Environment Life held to land , water, air and sea media.

Stage II: Do Socialization with Giving Information Warning Pollution and or damage environment Living in Society.

Environment and development in developed countries and developing countries have difference from corner his gaze. According to Emil Salim, there is a problem environment life faced by developing countries Lots brought about by compelling poverty people damage environment nature. So be clear that low income population, less it opened chance more work OK, level ongoing education low, all This has Keep going push residents of developing countries drain source Power natural for needs his life.

Stage III. Do Mutual agreement and commitment Control Pollution Environment.

Conserve environment life is a need that is not Can postponed again and not only become not quite enough answer government or the leader of the country alone, but not quite enough answer every human on earth, from toddler until seniors. Everyone should do business for save environment live nearby. We in accordance with their respective capacities. As small as whatever efforts we make do very big the benefits for realization decent earth inhabit for generation child grandchild We later.

Effort government for realize life fair and prosperous for its people without must give rise to damage environment followed up with formulate development programs frequent continuity called as development insightful environment.

CONCLUSION

Insightful development environment is business increase quality man in a way gradually with pay attention factor environment. Insightful development environment known with name Sustainable Development. In determine goals and objectives need consider competencies possessed all source Power in organization. Entire resource in organization must have capacity and excellence for achievement goal. Objective is One between components component planning strategic Where formulate description about conditions desired by the Environmental Service Life Bone Regency during period five years' time forward based on Task Principal and Functions, as well as as effort for support achievement development Government The stated district in RPJMD. Goals and Targets who wants achieved by the Environmental Service Life with notice vision and mission Regional Heads (Regents and Deputy Regents) as well as refers to the Term Development Plan Regional Middle School (RPJMD). Achievement goals and objectives the on realized in form of programs and activities that will be implemented by the Environmental Service Life Bone Regency in the village Kading in Year Budget 20 23.
